

Reservations that handle themselves.

A voice assistant that answers the phone in your guests' language, a live floor plan of your restaurant and automatic notifications, in one system.

Answers 24/7

English, German, Romanian

Phone and website chat

THE SITUATION TODAY

What you lose when the phone rings mid-service

- ✗ **Missed calls**
At peak hours, staff are serving. A guest who can't get through calls another restaurant.
- ✗ **Guests who don't show**
With no reminders and no easy way to cancel, the table stays empty all evening.
- ✗ **The booking diary**
Double bookings, hard-to-read handwriting, and occupancy visible only at the front desk.
- ✗ **Poorly matched tables**
A party of 3 at a table for 8, a party of 10 turned away while two adjoining tables sat free.

THE SOLUTION

Three pieces that work together

1

Voice agent

Answers the phone and the website, checks free tables and books on the spot, with a warm, natural voice.

2

Live floor plan

Dining room, private booths and terraces, every table colour-coded by status, on desktop, tablet and phone.

3

Notifications

Confirmations, reminder calls and SMS, cancellations and a waiting list, sent automatically.

HOW A RESERVATION GOES

1

The guest calls or writes

Ioana, the agent, answers at once in English, German or Romanian, and recognises returning guests.

2

Checks on the spot

Free tables at the requested time, the right table, tables joined for groups; suggests alternatives.

3

Confirms

The booking appears on the live plan; the guest gets a code and a confirmation by SMS and email.

4

Reminds

A call or SMS before the visit; a cancellation frees the table for the waiting list.

WHAT YOU ACTUALLY GAIN

Team time, back on the floor

Staff serve guests instead of answering the phone.

Bookings around the clock

Late at night or early morning, by phone and chat.

Better use of tables

The right table for every group, tables combined automatically.

Fewer empty tables

Reminders, easy cancellation, a waiting list.

Your data stays yours

In a Google Sheet on the restaurant's account.

Grows with your business

A new location is added with a single form.

Included in every package: a dedicated phone number the agent answers, a booking chat on your website, returning guests recognised, three languages (English, German and Romanian), all calls and SMS, plus automatic transfer of the call to the restaurant if the voice service is down.

Packages and prices

LAUNCH OFFER: ALL PRICES HALF OFF

Subscription: a fixed monthly price, sized to your restaurant
